McKesson Manifest Review

---

This memorandum summarizes research performed – at EPA’s request – by Science Applications International Corporation (“SAIC”) related to Freon 11 and Freon 113 use at the former McKesson Chemical Company (“McKesson”) facility. In preparing this memorandum, the following evidentiary sources were reviewed:

- McKesson manifests dated May 3, 1984 to April 26, 2000

EPA requested a list of manifests for EPA Generator ID CAD060395753 from the Department of Toxic Substances Control (“DTSC”). A total of 63 manifests were identified by the DTSC. SAIC obtained electronic copies of 51 of the 63 manifests.<sup>1</sup> The manifests covered the time period from May 3, 1984 to April 26, 2000.

SAIC reviewed the manifests for evidence of Freon 11 and Freon 113. Seven manifests, dated 1985 to 1995, were found showing Freon 113 disposal. The manifest number and shipment date of the seven manifests are shown in the table below. No manifests were found showing Freon 11 disposal.

Manifest Number	Shipment Date
84341622	5/2/1985
93027737	5/9/1994
93644981	9/14/1994
95023037	12/01/1994
95208994	4/13/1995
95208991	6/26/1995
95208993	11/20/1995

---

<sup>1</sup> One additional manifest (# 84254603) was obtained and reviewed by SAIC. The EPA Generator ID listed on the manifest (CAD060395) is missing the last three digits but otherwise matches McKesson’s EPA Generator ID (CAD060395753). This manifest was not included on the original list provided by DTSC.
